

Caring for Your Well-being Through Preventive Care

In keeping with our Employee Value Proposition, Brunswick offers a wide range of benefits to help with life's ever-changing situations. Preventive checkups can help catch health issues early – which may speed up recovery and lessen the severity of treatment. It is important to discuss preventive testing with your primary care provider (PCP).

Medical – in-network wellness or preventive services are covered 100% with no deductible. Services include annual checkups, well baby care, immunizations, well women/men checkups and cancer screenings (including Cologuard). Expectant mothers can also participate in the Special Beginnings program through UnitedHealthcare.

Dental – in-network preventive services are covered 100% with no deductible. In addition, increased frequency of cleanings for certain health conditions such as diabetes, kidney failure, cancer patients and for expectant mothers is also covered 100% with no deductible.

Vision – in-network exams are covered 100%. Eye exams are not only a good check for your vision but can also help catch early signs of certain health conditions such as diabetes and high cholesterol.

Well-Being – Be Your Best program provides self-directed activities related to nutrition, movement, finances and mental health. All benefits-eligible employees in the U.S. have access to the Brunswick Be Your Best program.

Information on these services and other benefit plans along with the Summary Plan Descriptions can be found on Brunswick Connect bconnect.brunswick.com/sites/homepage and click on Benefits.

RESOURCES

If you don't have a primary care provider, contact Health Advocate (a support service that can help you find doctors and make appointments) or check for primary care providers at myuhc.com.
